

JOAQUIN ALFREDO INCIO DIAZ

Game Developer | Unity & VR Developer

Phone: +51 987 986 677 | E-mail: joaquin.incio2002@gmail.com | Lima, Peru

Portfolio: <https://godargos.itch.io> | <https://github.com/GodArgos>

LinkedIn: <https://www.linkedin.com/in/joaquin-incio/>

Bachelor's degree in Systems Engineering from the Universidad de Lima (Top 10% of the class), with strong knowledge in video game development and interactive applications. Hands-on experience developing video games with Unity, including gameplay programming, VR/AR experience development, and interactive mechanics design in non-academic production environments. Advanced English proficiency. Skilled in Unity (C#), XR development using XR Interaction Toolkit, and version control with Git. Strong problem-solving skills, teamwork, fast learning ability, and adaptability to demanding technical environments. Seeking to join a development team to contribute to the creation of immersive solutions using Unity and XR technologies while continuing to grow technically through real-world projects.

PROFESSIONAL EXPERIENCE

UNIVERSIDAD DE LIMA | PERU

GAME DEVELOPMENT INTERN – UNITY / VR

AUG. 2023 – JUL. 2025

- Developed applications and video games in Unity (C#) for VR, AR, desktop, and mobile platforms within a professional production environment.
- Implemented interactive virtual reality experiences in both single-player and cooperative modes.
- Programmed gameplay mechanics, interaction systems, and application logic using C#.
- Migrated existing projects to stable Unity versions while integrating new features and technical improvements.
- Maintained and optimized VR/AR applications focused on architectural visualization and interactive environments.
- Designed and prototyped interactive solutions through full development cycles (design, programming, testing, and delivery).

Achievements:

- Developed multiple multiplayer VR experiences presented at institutional university events.
- Participated in four projects during the last year (three VR projects and one maintenance project), taking on key technical responsibilities.
- Received recognition for technological innovation in immersive virtual reality experience development.

THE ARRABELLE AT VAIL SQUARE - WORK & TRAVEL PROGRAM | USA

HOUSEPERSON

DEC. 2023 – MAR. 2024

- Supported the housekeeping team in preparing and restocking guest rooms while meeting strict organization and time standards.
- Coordinated supply transportation with the laundry department to ensure operational continuity.
- Responded to guest amenity requests and operational support needs while maintaining a professional and friendly service attitude.

Achievement: Strengthened intercultural communication and teamwork skills while collaborating with staff and guests from the United States, Chile, Colombia, and Mexico in a demanding work environment.

EDUCATION

UNIVERSIDAD DE LIMA | APR. 2020 – JUL. 2025

Bachelor's Degree in Systems Engineering | Top 10% of the class

UNIVERSIDAD DE LIMA | MAR. 2026

Specialization Diploma in Videogame Development

FEATURED COURSES

VIDEOGAME DEVELOPMENT COURSE | AUG. 2024 – DEC. 2024

Final Project: “Crazy Rappi” – Driving Game (Prototype)

- Programmed gameplay mechanics and game logic in Unity (C#), focused on driving systems and time-based objectives.
- Designed game levels and routes, adapting gameplay to an urban environment inspired by districts of Lima.
- Participated in project direction, aligning mechanics, environment design, and player experience.
- Implemented prototype environments representing districts such as Miraflores, Downtown Lima, and San Isidro, integrating visual references and local elements.

VIDEOGAME DESIGNING COURSE | APR. 2023 – JUL. 2023

Final Project: “PAWS” – 2.5D Platformer Game (Prototype)

- Applied video game design principles using the MDA framework (Mechanics, Dynamics, Aesthetics).
- Programmed gameplay mechanics and basic game logic in Unity (C#).
- Collaborated on project direction and level design, aligning narrative, objectives, and player experience.
- Worked within a multidisciplinary team using an iterative development approach and tight deadlines.

Achievements:

- Developed a functional 2.5D prototype within approximately 1–1.5 months, integrating 2D aesthetics in a 3D environment.
- Presented the project at an academic event with industry professionals, strengthening networking opportunities and external feedback.
- Won First Place in the Entertainment Category – Level 1 at the 2023 Innovation in Communication Competition (Universidad de Lima).

COMPLEMENTARY EDUCATION

UDEMY | JAN. 2026 - FEB. 2026

[Math For Video Games: The Fastest Way To Get Smarter At Math](#)

IDIOMAS

English: Advanced | Idiomas PUCP

Spanish: Native

TECHNICAL SKILLS

Game Development

- Unity (Gameplay, Animation, Audio, Physics): Intermediate
- C# (OOP, gameplay logic): Intermediate–Advanced
- C++: Intermediate

VR / XR Development

- Unity XR Interaction Toolkit (interactions, locomotion)

Multiplayer

- Mirror Networking (client-server, synchronization)

Tools & Version Control

- Git, GitHub, GitLab

PROGRAM PARTICIPATION

TELAR – Game Development Workshop | FEB. 2026 – MAR. 2026

Intensive 3-week workshop focused on developing video games with cultural and social themes, bringing together multidisciplinary teams to create a game around the topic “Democracy Under Tension.”

Final Project: “Politikito: La carrera de Tico” – Virtual Pet Simulator (Prototype)

- Programmed gameplay mechanics and point-and-click interaction systems in Unity (C#).
- Implemented character statistics and progression system connected to player decisions.
- Developed drag-and-drop minigames and interactions affecting character progression.
- Integrated adaptive audio using FMOD, coordinating technical implementation with sound design.
- Collaborated within a multidisciplinary team (art, narrative, music, and programming) to deliver a functional prototype within an intensive three-week development cycle.

ADDITIONAL INFORMATION

In November 2024, I participated as a workshop instructor in the International Seminar: Emerging Technologies in Research organized by Universidad Marcelino Champagnat. I conducted a practical Augmented Reality workshop focused on developing functional prototypes. The workshop guided participants through mini-projects using non-code and low-code tools and was delivered in three technical sessions for different groups.
